

# Web-enabled Managed Solutions

Bringing low cost, managed services and hosting to various sized businesses is the goal of Prescient Information Systems. The Web-enabled Managed Solutions Platform allows clients to have “Enterprise-level” service by looking to one source for PC and server support, network security, IP telephone systems and other services

Prescient will work with the client to customize the right business solution platform, providing complete management and support of networks, data and software. Whatever the size of the business, whether it is established or start-up; out-sourcing IT enables the client to preserve valuable resources, costs and time to focus on what they do best– managing their core business!

Prescient’s Managed Solution Platform is available for all phone, internet, computing services and support for one low fixed, monthly fee.
